BOAT**

ABOUT US

ECHT Marine's Bumper Boat is a smart, high-performance water attraction crafted for commercial entertainment spaces. Designed to deliver safe, controlled fun, it offers the perfect balance between durability, comfort, and excitement — making it an ideal choice for water parks, resorts, recreational lakes, amusement parks, and floating leisure zones.

Its compact circular structure ensures smooth navigation even in limited water spaces, while the robust LLDPE construction provides superior impact resistance and long-term durability in continuous-use environments. The boat is lightweight yet strong, allowing for easy handling, installation, and maintenance.

Powered by a 2.4 HP Mercury Engine, the Bumper Boat delivers reliable performance with smooth control, making it safe for family rides and ideal for both kids and adults. With a seating capacity of 1 adult + 2 children, it is designed as a family-friendly attraction that increases engagement, ride turnover, and overall customer experience.

The low water operation requirement (minimum 2 ft depth) makes it highly adaptable across multiple site types, reducing infrastructure costs and increasing operational flexibility for operators and developers.

BUMPER BOAT

MATERIAL	LLDPE
PERSON CAPACITY	1 ADULT + 2 CHILDREN
OVERALL DIAMETER	5.95 FT
